

### Core capability

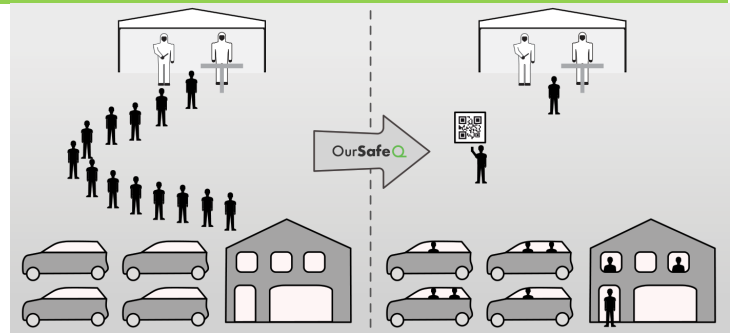

TATO LLC offers OurSafeQ – an innovative Queue Management System (QMS). OurSafeQ meets an immediate need for users (medical centers, clinics, vaccine distribution sites, offices, agencies, etc) to eliminate lines and waiting, facilitate social distancing, streamline procedures, and improve the distribution experience. Importantly, OurSafeQ completely protects privacy and data security.

- Queue Management Technology (Cloud SaaS)
- Eliminates lines and waiting. Improves capacity management and logistics of distribution services.
- Immediately deployable—even at popup locations.
- Facilitates social distancing.

### Differentiators

- Instant set up. Virtual lines can be created in seconds easily.
- Scalable. Unlimited number of customers, lines, or locations. Adaptable upon request.
- No infrastructure beyond a computer or smartphone required. Little to no training required.
- Immediately useable by anyone. OurSafeQ is not an app and does not require downloads or installation; customers without phones are accounted for.
- Easy to use and operate. Create orderly virtual queues in seconds.
- Flexible and powerful. Advanced features such as chat or SMS allow prescreening or communication.

- 100% privacy preserving. No Personally Identifiable Information (PII) is ever stored or aggregated by OurSafeQ.
- QR and geofence technology. SMS, broadcasting.
